### **DETAILED ACTION**

Receipt is acknowledged of applicants' response to the restriction requirement (filed on 27 May 2008).

### ***Election/Restrictions***

Applicants' election with traverse of Group I in the reply filed on 27 May 2008 is acknowledged. The traversal is on the ground that the layers of Plachetka are expanding circles around a core while the instant application discloses layers disposed in a linear fashion. This is not found persuasive because applicants have not claimed layers disposed in a linear fashion. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

It should be noted that claims 28 and 30 recite process claims, which is a different statutory class of invention from Group I. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to

Art Unit: 1618

be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

The requirement is still deemed proper and is therefore made FINAL.

Claims 2-15, 17-19, 28, and 30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 27 May 2008.

#### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a

separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,946,685 ("Edgren").

Edgren discloses a multilayer oral dosage form comprising:

- the matrix core comprising a therapeutically effective amount of a first drug wherein the matrix core allows sustained release of the first drug of instant claim 1(a) (see col. 6, line 55 – col. 7, line 54; figure 3, 13 and 14);
- the first layer in contact with the core comprising a therapeutically effective amount of a second drug wherein the first layer allows sustained release of the first drug of instant claim 1(b) (see col. 6, line 55 – col. 7, line 54; figure 3, 12 and 14); and
- the second layer in contact with the core comprising a therapeutically effective amount of a second drug wherein the second layer allows immediate release of the second drug of instant claim 1(c) (see col. 6, line 55 – col. 7, line 54; figure 3, 15 and 16).
